

## Water Features and Fountains Maintenance and Treatment

**We provide additional services relating to the refurbishment and upgrading of existing systems, improvements to meet current HSE legislation, water hygiene audits, Legionella control and the provision for the maintenance of all types of installations**

IWS offers a full range of services from a fully comprehensive report on the operational aspects of the system, to individual specialist works as identified during the current maintenance regime. Maintenance packages in various levels of attendance can also be provided, including provision for a 24 hour emergency callout facility.

A fully comprehensive preventative maintenance package and annual system health checks, in addition to the clients routine maintenance schedule.

IWS's experience gained from many years of working with Local Authorities, Water and Utility Companies gives us a unique understanding of the requirements and standards demanded in today's safety and cost conscious workplace. The ability to interpret a client's individual needs and to supply the most cost-effective solutions makes IWS the leader in its field.

We provide additional services relating to the refurbishment and upgrading of existing systems, improvements to meet current HSE legislation, water hygiene audits, Legionella control and the provision for the maintenance of all types of installations.

All of our Legionella risk assessments are completed by City and Guilds qualified, competent and experienced professionals, in accordance with LB HSG274, British Standard BS 8580 and UKAS ISO/IEC 17020:2012.

#### **Monthly Public Health England Report**

Public Health England provides a monthly report detailing the number of cases of confirmed Legionnaires disease. This helps to identify sources of infection so that control measures can be kept up to standard and improved on: <https://www.gov.uk/government/publications/legionnaires-disease-monthly-surveillance-reports-2019>
